See accompanying notes to the consolidated financial statements.

1. Basis of presentation:

These unaudited interim consolidated financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles (Canadian GAAP) on a basis consistent with Cardiome Pharma Corp.'s (the Company's) annual audited consolidated financial statements for the year ended December 31, 2007, except as described in note 2 below. These unaudited interim consolidated financial statements do not include all note disclosures required by Canadian GAAP for annual financial statements, and therefore should be read in conjunction with the annual audited consolidated financial statements for the year ended December 31, 2007 filed with the appropriate securities commissions. The results of operations for the three-month and nine-month periods ended September 30, 2008 and September 30, 2007 are not necessarily indicative of the results for the full year.

The Company has financed its cash requirements primarily from share issuances, payments from research collaborators and licensing fees. The Company's ability to realize the carrying value of its assets is dependent on successfully bringing its technologies to market and achieving future profitable operations, the outcome of which cannot be predicted at this time. It may be necessary for the Company to raise additional funds for the continuing development of its technologies.

2. Changes in accounting policies:

On January 1, 2008, the Company adopted the Canadian Institute of Chartered Accountants (CICA) Handbook section 1535, *Capital Disclosures* (Section 1535), Handbook section 3862, *Financial Instruments - Disclosures* (Section 3862) and Handbook section 3863, *Financial Instruments – Presentation* (Section 3863).

(a) Capital disclosures:

Section 1535 specifies the disclosure of (i) an entity's objectives, policies and processes for managing capital; (ii) quantitative data about what the entity regards as capital; (iii) whether the entity has complied with any capital requirements; and (iv) if it has not complied, the consequences of such non-compliance.

The Company has included disclosures to comply with Section 1535 in note 6 of these consolidated financial statements.

(b) Financial instruments:

Sections 3862 and 3863 replace Handbook Section 3861, *Financial Instruments – Disclosure and Presentation*, revising and enhancing its disclosure requirements, and carrying forward unchanged its presentation requirements.

Section 3862 requires entities to provide disclosures in their financial statements that enable users to evaluate the significance of financial instruments on the entity's financial position and

2. Changes in accounting policies (continued):

(b) Financial instruments (continued):

its performance and the nature and extent of risks arising from financial instruments to which the entity is exposed during the period and at the balance sheet date, and how the entity manages those risks.

Section 3863 establishes standards for presentation of financial instruments and nonfinancial derivatives. It deals with the classification of financial instruments, from the perspective of the issuer, between liabilities and equities, the classification of related interest, dividends, losses and gains, and circumstances in which financial assets and financial liabilities are offset.

The adoption of these standards did not have any impact on the classification and valuation of the Company's financial instruments. The Company has included disclosures to comply with these new Handbook Sections in note 7 of these consolidated financial statements.

3. Future changes in accounting policies:

(a) Goodwill and Intangible Assets

In February 2008, the CICA issued Handbook Section 3064, *Goodwill and Intangible Assets*, which replaced Section 3062, *Goodwill and Other Intangible Assets*, and Section 3450, *Research and Development Costs*. Section 1000, *Financial Statement Concepts*, was also amended to provide consistency with this new standard. The new section establishes standards for the recognition, measurement and disclosure of goodwill and intangible assets. The standard applies to interim and annual financial statements for fiscal years beginning on or after October 1, 2008. The Company is currently assessing the impact of this new accounting standard on its consolidated financial statements.

(b) International Financial Reporting Standards

On February 13, 2008, the Accounting Standards Board confirmed that the use of International Financial Reporting Standards ("IFRS") will be required, for fiscal years beginning on or after January 1, 2011, for publicly accountable profit-oriented enterprises. After that date, IFRS will replace Canadian GAAP for those enterprises. The Company is currently assessing the impact of these new accounting standards on its consolidated financial statements.

4. Share capital:

(a) Authorized:

The authorized share capital of the Company consists of an unlimited number of common shares without par value, and an unlimited number of preferred shares without par value issuable in series.

(b) Issuance of preferred shares:

On July 25, 2008, the Company closed a non-brokered private placement of 2,272,727 Series A convertible preferred shares at a price of US$11.00 per share for gross proceeds of $25,490 (US$25,000) to CR Intrinsic Investments, LLC. The preferred shares will be convertible into common shares of the Company on a one-to-one basis as of October 25, 2008, at the option of CR Intrinsic Investments, LLC. Subject to certain timing restrictions, the preferred shares will be convertible into common shares on a one-to-one basis at the option of the Company. In the event of a change of control of the Company, each preferred share will automatically convert immediately prior to the closing of the change of control event. No coupon or interest is payable on this series of preferred shares. In connection with the private placement, the Company incurred total legal and professional fees of $81 relating to this transaction.

In connection with the private placement, the Company is required to use its reasonable best efforts to file a Canadian prospectus and related U.S. registration statement (the "registration statement") to register the shares issuable upon conversion of the Series A preferred shares. If the registration statement does not become effective after 165 days from the issuance of the preferred shares (by January 6, 2009) or its effectiveness is not maintained once achieved, the Company is subject to a registration payment arrangement under which it is required to pay an amount equal to 1.5% of the purchase price of the preferred shares on the thirtieth day following the failure to meet the effectiveness requirement and for each thirtieth day thereafter until the earlier of obtaining effectiveness or July 25, 2009. The maximum amount that the Company could be required to pay if it fails to obtain or maintain an effective registration statement is $2,549. The Company has not recorded a liability related to the registration payment arrangement at September 30, 2008, because it does not believe that payment is probable. At September 30, 2008, the Company was in the process of filing the registration statement.

(c) Stock options:

At September 30, 2008, the Company had 4,848,562 stock options outstanding, of which 3,688,415 are exercisable, at a weighted average exercise price of $8.32 per common share and expiring at various dates from October 15, 2008 to September 5, 2013.

(Expressed in thousands of Canadian dollars except share and per share amounts and where otherwise indicated)

4. Share capital (continued):

(c) Stock options (continued):

Details of stock option transactions for the nine months ended September 30, 2008 are summarized as follows:

	Number of stock options outstanding	Weighted average exercise price
Balance, December 31, 2007	5,039,849	$ 8.41
Options granted	33,000	8.30
Options exercised	(35,000)	3.46
Options forfeited	(189,287)	11.60
Balance, September 30, 2008	4,848,562	$ 8.32

At September 30, 2008, stock options to executive officers and directors, employees, consultants and clinical advisory board members were outstanding as follows:

	Options outstanding			Options exercisable	
Range of exercise price	Number of common shares issuable	Weighted average remaining contractual life (years)	Weighted average exercise price	Number of common shares issuable	Weighted average exercise price
$3.32 - $5.54	1,205,200	0.59	$ 3.70	1,205,200	$ 3.70
$6.06 - $8.95	1,647,353	2.27	7.78	1,416,603	7.71
$8.98 - $11.15	1,013,767	4.17	10.17	462,985	10.21
$11.26 - $14.59	982,242	4.17	13.01	603,627	13.18
	4,848,562	2.63	$ 8.32	3,688,415	$ 7.61

(d) Stock-based compensation:

The estimated fair value of options granted from December 1, 2002 to officers, directors, employees, clinical advisory board members and consultants is amortized over the vesting period. Compensation expense is recorded in research and development expenses and general and administration expenses as follows:

(Expressed in thousands of Canadian dollars except share and per share amounts and where otherwise indicated)

4. Share capital (continued):

(d) Stock-based compensation (continued):

	Three months ended		Nine months ended	
	September 30, 2008	September 30, 2007	September 30, 2008	September 30, 2007
Research and development	$ 82	$ 732	$ 891	$ 1,903
General and administration	442	887	1,604	3,342
Total	$ 524	$ 1,619	$ 2,495	$ 5,245

The Company did not grant any stock options during the three months ended September 30, 2008. The weighted average fair value of stock options granted during the nine months ended September 30, 2008 was $3.61 per option (three and nine months ended September 30, 2007: $5.15 and $6.31 per option, respectively).

The estimated fair value of the stock options granted was determined using the Black-Scholes option pricing model with the following weighted-average assumptions:

	Three months ended		Nine months ended	
	September 30, 2008[(i)]	September 30, 2007	September 30, 2008	September 30, 2007
Dividend yield	-	0.0%	0.0%	0.0%
Expected volatility	-	55.1%	47.2%	59.7%
Risk-free interest rate	-	4.5%	3.4%	4.4%
Expected average life of the options	-	5.3 years	4.5 years	5.5 years

(i) No stock options granted during three months ended September 30, 2008.

5. Related party transactions:

The Company has incurred expenses for services provided by a law firm in which an officer is a partner. The amounts charged are recorded at their exchange amounts and are subject to normal trade terms. For the three and nine months ended September 30, 2008, the Company has incurred $471 and $1,122 respectively, of legal fees for services provided by the law firm relating to general corporate matters and review of partnership opportunities and other strategic alternatives (three and nine months ended September 30, 2007 - $227 and $756, respectively, relating to general corporate matters and the completion of the public offering in January 2007). Included in accounts payable and other liabilities at September 30, 2008 is an amount of $360 (December 31, 2007 - $540) owing to the law firm.

6. Capital Disclosures:

The company's objective in managing capital is to safeguard its ability to continue as a going concern and to sustain future development of the business. The Company includes shareholders' equity, excluding accumulated other comprehensive income in its definition of capital. The Company's objective is met by retaining adequate equity to provide for the possibility that cash flows from assets will not be sufficient to meet future cash flow requirements. In order to maintain or adjust its capital structure the Company may issue new shares or raise debt. At this time the Company has not utilized debt facilities as part of its capital management program nor paid dividends to its shareholders. The Board of Directors does not establish quantitative return on capital criteria for management. The Company is not subject to any externally imposed capital requirements and the Company's overall strategy with respect to capital management remains unchanged from the year ended December 31, 2007.

7. Financial instruments:

The Company's financial instruments consist of cash and cash equivalents, short-term investments, accounts receivable, accounts payable and other liabilities. The fair values of these financial instruments approximate carrying value because of their short-term nature.

The Company enters into certain non-financial contracts which contain embedded foreign currency derivatives. The fair value of the embedded derivatives is determined by the change in the forward exchange rates between the date of the contract and reporting date. At September 30, 2008, the Company did not have any outstanding embedded derivative contracts.

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk and market risk.

(a) Credit rate risk

Credit risk is the risk of financial loss to the Company if a partner or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Company's cash and cash equivalents, short-term investments and accounts receivable. The carrying amount of the financial assets represents the maximum credit exposure.

The Company limits its exposure to credit risk on cash and cash equivalents and short-term investments by placing these financial instruments with high-credit quality financial institutions and only investing in liquid, investment grade securities.

The Company is subject to a concentration of credit risk related to its accounts receivable as they primarily are amounts owing from one collaborator. At September 30, 2008, the outstanding accounts receivable were within normal payment terms and the Company had recorded no allowance for doubtful accounts.

(Expressed in thousands of Canadian dollars except share and per share amounts and where otherwise indicated)

7. Financial instruments (continued):

(b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. The Company manages its liquidity risk by continuously monitoring forecasted and actual cash flows, as well as anticipated investing and financing activities. The majority of the Company's financial liabilities are due within ninety days. The Company does not have long-term financial liabilities.

(c) Market risk

Market risk is the risk that changes in market prices, such as foreign currency exchange rates and interest rates will affect the Company's income or the value of the financial instruments held.

(i) Foreign currency risk

Foreign currency exchange rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company is exposed to currency risks primarily due to its U.S. dollar and European Union Euro denominated cash and cash equivalents, accounts payable and other liabilities, operating expenses and its U.S. dollar denominated accounts receivable. The Company manages foreign currency risk by holding cash and cash equivalents in U.S. dollars and the European Union Euro to support foreign currency forecasted cash outflows. The Company has not entered into any forward foreign exchange contracts.

The Company is exposed to the following currency risk at September 30, 2008:

(Expressed in foreign currencies)	**U.S. $**	**Euro**
Cash and cash equivalents	34,539	2,173
Accounts receivable	900	-
Accounts payable and other liabilities	(4,256)	(3,833)
Financial instrument exposure	31,183	(1,660)

The Company was exposed to the following currency risks during the three and nine months ended September 30, 2008:

	Three months ended September 30, 2008		Nine months ended September 30, 2008	
(Expressed in foreign currencies)	U.S. $	Euro	U.S. $	Euro
Net operating expenses	3,817	1,424	14,070	8,858

(Expressed in thousands of Canadian dollars except share and per share amounts and where otherwise indicated)

7. Financial instruments (continued):

(c) Market risk (continued)

(i) Foreign currency risk (continued)

The following exchange rates applied for the three and nine months ended September 30, 2008:

	Q3 Average rate	YTD Average rate	September 30, 2008 Reporting date rate
USD to CAD	1.042	1.019	1.064
Euro to CAD	1.562	1.549	1.498

The Company has performed a sensitivity analysis on its U.S. dollar and European Union Euro denominated financial instruments and operating expenses. Based on the Company's foreign currency exposures noted above and assuming that all other variables remain constant, a 10% appreciation of the U.S. dollar and European Union Euro against the Canadian dollar would result in the following impact on net loss for the three and nine months ended September 30, 2008:

Source of net loss variability from changes in foreign exchange rates	Three months ended September 30, 2008		Nine months ended September 30, 2008	
	U.S. $	Euro	U.S. $	Euro
Financial instruments	3,318	(249)	3,318	(249)
Net operating expenses	(398)	(222)	(1,433)	(1,372)
Decrease (increase) in net loss	2,920	(471)	1,885	(1,621)

For a 10% depreciation of the U.S. Dollar and the European Union Euro against the Canadian dollar, assuming all other variables remain constant, there would be an equal and opposite impact on net loss.

(Expressed in thousands of Canadian dollars except share and per share amounts and where otherwise indicated)

7. Financial instruments (continued):

(c) Market risk (continued)

(i) Foreign currency risk (continued)

The following table summarizes the foreign exchange gains and losses relating to financial instruments included in the consolidated statement of operations and comprehensive loss:

	Three months ended September 30, 2008	Nine months ended September 30, 2008
Financial assets		
Held for trading financial assets	$ 1,298	$ 3,172
Loans and receivables	(19)	(17)
Financial liabilities		
Held for trading financial liabilities	264	(525)
Financial liabilities measured at amortized cost	202	(700)
Foreign exchange gain	$ 1,745	$ 1,930

(ii) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk arising primarily from fluctuations in interest rates on its cash and cash equivalents and short-term investments. The Company limits its exposure to interest rate risk by continually monitoring and adjusting portfolio duration to align to forecasted cash requirements. During the three and nine months ended September 30, 2008, the Company earned interest income of $164 and $586, respectively on its cash and cash equivalents and short-term investments. Based on the value of cash and cash equivalents and short-term investments during the three and nine months ended September 30, 2008, an increase of 25 basis points in interest rates during the period, with all other variables held constant, would have increased equity and decreased net loss by $78 and $279, respectively.

8. Comparative figures:

Certain of the comparative figures have been reclassified to conform with presentation adopted in the current period.
